BUSINESS FOR SALE!

28" MIDGET HOIST™

Universal Vehicles Parts Puller

Replaces 15 Parts by one (1) Man Without Lifting the Vehicle on air!

2. EXECUTIVE SUMMARY

- A. PRODUCT:** **28" Midget Hoist™ INVENTION** : The world's smallest hoist for repairing all vehicles of 2000 Lbs and more, including busses, airports, agriculture and mines vehicles. **There is no such other tool, and this is the only one in the world which can be used as suggested.** It is only seven Inches (7") high when the cylinder (Jack) is down, and 28" when the cylinder is up.
- B. METHODS:** A REVOLUTIONIZED, UNKNOWN REPAIR METHOD: Whereby, without lifting the vehicle on air, with mechanic instead of 2-3, the hoist enables replacement of **15** different parts **EASIER, FASTER** and **SAFER**, saving money on repair and down time.
- C. COMPARISON:** In current repair techniques, mechanics **MUST** lift the vehicle on air, while a driver with a cherry picker drives under the vehicle to support a part to be replaced, whereby, often, damages occur to electric and oil lines, in a complicated and long process, which takes hours for each part, replaced.
- D. EFFICIENCY:** Saving more than 10 hours of repair a week, the hoist pays itself in 2-3 months, saving the users time, manpower, money and bodily injury (work comps).

E. BRIEF DESCRIPTION:

The world's smallest maintenance tool, the 28" Midget Hoist is the most revolutionary hoist, which enables one mechanic to perform work of 2-3 men in replacing 15 different parts of vehicles of all types (over 2000 Lbs) without lifting the vehicle on air, FASTER, SAFER and EASIER. The Parts are:

DIFFERENTIAL: FRONT

DRIVE LINE

AXLE HOUSING

REAR SPRINGS

SUSPENSION SPRINGS

TRANSMISSION SPLITTER BOX

BOOSTER WHEELS

PUSHER WHEELS

DIFFERENTIAL: REAR

BRAKE DRUM

POWER DIVIDER

STEERING BOX

BATTERY BOX

FLY WHEELS

WATER TANK

It is also ideal for road and out of shop repairs, yet it weighs only 64 pounds. The MIDGET HOIST™ was already purchased by the US Air Force, US Navy, US Army Depot, the National Guard, and private companies such as Arrowhead Water, Burlington Northern and electric companies. The Army of a foreign country had also recently purchased it.

The MIDGET HOIST enables the mechanic to maneuver the parts he replaces 360 degrees for easy alignment and installation. Also, using the mini hoist, mechanics no longer carry the parts, which perfectly complies with the new safety codes prohibiting mechanics from carrying more than 40 lbs.

F. PROGRESS:

1. Several branches of the U.S. Defense examined the hoist and submitted "favorable recommendations" which led to the purchasing of about 35 units at reduce price of \$1126 each.
2. The U.S. Defense also assigned a new and special National Stock Number (NSN), and put the hoist on the national governmental computerized system ready to purchase.
3. Shairon int'l. has been manufacturing the hoist in the U.S., with all parts being U.S. made. The manufacturing process was accepted and done by the U.S. Defense standards of manufacturing and safety.

G. PROPOSAL: **Purchasing the business (currently inactive** for budget reason), or a combination of lower fee and partnerships. (\$85,000, or \$45,000 + partnerships).
