28" MIDGET HOIST™

Universal Vehicles Parts Puller

***Replaces 15 Parts by one (1) Man Without Lifting the Vehicle
On Air!***

1. PRESS RELEASE

REVOLUTIONARY WORLD'S SMALLEST HOIST REPLACES 15 PARTS OF HEAVY TRUCKS AND BUSES BY ONE PERSON; TRIPLES PRODUCTIVITY, PREVENTS INJURIES; MADE IN THE USA.

U.S. DEFENSE GRANTED NSN # 4910-01-368-7623

TEMPE, ARIZONA....Shairon Int'l. Trade Co. has initiated marketing of the 28" Inch MIDGET HOIST™ which significantly increases the efficiency of truck maintenance mechanics. It has already been purchased by the US Air Force, Navy, Tooele Army Depot, National Guard and other private companies. A special federal NSN (National Stock Number) has also been assigned to the MIDGET HOIST.

A new technique for heavy truck maintenance is also introduced, by using the 64 pound, 28" high Midget Hoist. It enables one mechanic to perform the task of two or three in replacing 15 different parts under the truck, without having to raise the truck. Therefore, it eliminates the use of floor or overhead cranes for these purposes.

Many major repairs and replacement work can be completed easier, faster and safer by using the Midget Hoist, thereby reducing maintenance costs, vehicle down-time and injuries.

New safety codes prohibit one mechanic from carrying more than 40 pounds. The Midget hoist is an excellent solution to these requirements, since with this hoist mechanics no longer carry any of the 15 parts, such as: DIFFERENTIAL, BRAKE DRUM, SPRINGS, AXLE; DRIVE LINE, etc.

Joseph Tsiyoni, the president of Shairon International, says that every truck maintenance shop or manufacturer definitely needs the Midget Hoist - "It's like providing an extra pair of super-hands for the mechanic. In addition, based on experience from years of development, tests and actual use, the Midget Hoist has been well received by the mechanics and shop managers who confirm it makes their job much easier and safer."

Shairon Int'l. Trade Co. develops ideas and markets its own products, and also manufactures and markets products for other inventors. It has the least expensive program for inventors in the USA.
