Stand 'N Walk Proudly™  
**REVOLUTIONARY PERSONAL TRANSPORTER**

**ATTENTION POTENTIAL DEALERS**

Attached please find our announcement regarding the new personal transporter, the PrideWay™ - PrideR™.

Similar to our 28" Midget Hoist Invention, we would welcome application to become a dealer by any company who is, or will be in the appropriate business of selling scooters, wheelchairs and personal transportation devises.

The terms of doing business will be determine later, after we are able to make a final determination of the production costs, wholesale and retail price.

Please note that we would respectfully request that a dealer purchases at least 25 PrideWay™ - PrideR™. Scooters, paid in advanced.

For more information, please contact us via email or by phone. You may also visit our web site [www.shairon.com](http://www.shairon.com).

**DETAILS:**

---

**INTRODUCING:** PrideWay™ - PrideR™

**Revolutionary Personal Transporter**

Shairon Int'l. Trade of Tempe AZ, announces the completion of its first working prototype of the revolutionary personal transporter, now called **PrideWay™** and **PrideR™**.

According to Mr. Tsiyoni, President of Shairon Int'l. Trade, and inventor of the new scooter, this scooter, to be introduced by a new division PrideWay.Com, is the future of personal transportation which will replace the Segway and other scooters, being much more effective, and less expensive. The PrideR will make significant changes in the way people use scooters and some types of wheelchairs. In addition, it will bring relief to many people who either cannot walk long distance, or at all, or those who need a transporter to move from one point to another, for whichever reason.

Further, the people who most benefit from this invention will be those individuals who have difficulties to walk, for whichever reason, but who also do not use the existing electric wheelchair and scooters. For those we say:

**Stand 'N 'Walk' Proudly™**

From the commercial standpoint, the new scooter may make other personal transporter, such as SEGWAY, obsolete for many reasons yet to be announced.

**PrideWay™** was designed for multiple purposes, some of which are listed here.

Most importantly, the users can operate the PrideR™ by standing and driving to their destination at a speed up to 5 MPH. ***"This is extremely important for many people who have a limited ability to walk, who can stand, but do not wish to sit on a wheelchair because of personal pride"*** says Mr. Tsiyoni. Experience shows, according to the inventor, that many people limited by prolonged walking feel shame or are uncomfortable using the ordinary wheelchairs currently available. The **PrideWay™** gives the user his/her pride back.

In addition, other users can drive the PrideR™ to destinations as far as 12.5 miles, and it can be used for many purposes. the **PrideWay™** is portable; it can be disassembled (into a few parts) and disassembled in 30 seconds, thus also easy loading onto a car trunk. Also, among other advantages of the PrideR, the price of the new scooter will be significantly low. More details to be posted on our new web: [WWW.PrideWay.Net](http://WWW.PrideWay.Net).
